Web Development Immersive

Udacity — Certificate

2018 - 2018 | Online

Web Front-End Foundations

ESPM — Post-Graduate Certificate

2014 - 2015 | Rio de Janeiro

Digital Marketing and Design

PUC-RIO — Bachelor

2008 - 2011 | Rio de Janeiro, Brazil

Design - Visual Communications

SUMMARY

I am a Full Stack Developer with a background in design, which gives me the experience to bring the client vision to life. As a developer I like the challenge to build web apps, researching for new functionalities to make it more practical to navigate through it, maximizing the user experience.

PROJECTS

Cosmic

A MEN stack CRUD app written to consume 3rd party API where the user can check the horoscope and keep track of its accuracy. Inside the team, I had the role of front-end developer, helping style and design the layout of this web app.

Technologies used: NodeJS, Express, API, HTML, CSS, Heroku.

Ludo

A strategy board game for two to four players created using the MERN stack and web sockets, so it can be played online and more than one game at a time.

Technologies used: React, NodeJS, Socket.io, MongoDB, JavaScript, HTML, CSS, JWT and Heroku

Where next?

A web app developed in Python to create bucketlists of spots in a specific city. The user can create new spots/cities, check the spot completed and upload pictures of it using the AWS to storage it.

Technologies used: Python, Django, HTML, CSS, AWS and PostgreSQL.

EXPERIENCE

On my past experiences I created visual contents that best described the brands identity, as banners and ads, for website, social media channels and marketing strategies. Also I developed HTML/CSS landing pages and newsletters.

Monte Carlo Joias — Design Coordinator

NOVEMBER 2015 - APRIL 2018 | Rio de Janeiro, Brazil

Reserva — Designer

JUNE 2015 - NOVEMBER 2015 | Rio de Janeiro, Brazil
