Digital Marketing and Design

PUC-RIO — *Bachelor*
2008 - 2011 | Rio de Janeiro, Brazil
Design - Visual Communications

LANGUAGES

English — *Fluent*
Portuguese — *Native*

SUMMARY

I am a Full-Stack Developer with 7 years experience in design, working mostly on e-commerce of fashion brands, designing landing pages which got me to want to learn programming languages.
As a developer I like the challenge to build web apps, researching for new functionalities to make it more practical to navigate through it, maximizing the user experience and bringing the client vision to life. Currently, I am working on the winning logic of the Ludo Game.

PROJECTS

Where next?
A web app developed in Python to create bucketlists of spots in a specific city. The user can create new spots/cities, check the spot completed and upload pictures of it using the AWS to storage it.

Technologies used: Python, Django, HTML, CSS, AWS and PostgreSQL.
Project | GitHub

Ludo
A strategy board game for two to four players created using the MERN stack and web sockets, so it can be played online and more than one game at a time.

Technologies used: React, Node.js, Socket.io, MongoDB, Javascript, HTML, CSS, JWT and Heroku
Project | GitHub

Cosmic
A MEN stack CRUD app written with RESTful API where the user can check the horoscope and keep track of its accuracy. Inside the team, I had the role of front end developer, helping style and design the layout of this web app.

Technologies used: Node.js, Express, API, HTML, CSS, Heroku.
Project | GitHub

EXPERIENCE

On my past experiences I created visual contents that best described the brands identity to different kind of media, as email marketing and banners, for website, social media channels. Also I developed HTML/CSS landing pages and newsletters.
